

# Streamline Your Migration with MiBridge<sup>®</sup> Conversion Solutions from Weidmüller

**Migration made easy.**  
**From old to new with minimized downtimes.**  
Update your PLC and DCS system quickly, easily, and without errors.

As an expert partner, we offer comprehensive know-how gained from decades-long experience, confident in our solutions for the latest trends and technologies in PLC and DCS migration.

**Significantly reduces downtime** required for the control migration. In some cases, the planned outages were reduced from 14 days to 1 day.

**Minimizes lost revenue** and costs directly associated with the migration.

**Eliminates wiring errors** since the field wiring is not to be moved and re-terminated. Our migration solution also saves time in verifying wiring before re-starting the facility.

**Acclaimed Approvals**  
The card adapters are cURus approved, and the certified cables are UL and CSA listed. In addition, the cables are RoHS and FT4 rated at 300V.

# Maximize Migration Efficiency

Space-saving bridging system

Convenient PLC/DCS changeover within a few hours

## Use independent of the manufacturer

Irrespective of the PLC manufacturer, at Weidmüller you'll find the perfect portfolio of migration components to suit your purpose.

## Compatibility means flexibility

- Keep your existing field terminations landed. No ring out needed!
- All components are plug-and-play with color-coded connectors to eliminate any chance of wiring errors.

## Chassis & Bridge

- Racks are fitted with a hinged cover which provides access to old cabling.
- No additional space in the control cabinet required.
- New controller is mounted on top of existing controller.

## Adapter Module & Cables

- Tailored to the individual requirements of your system
- Greater efficiency and safety in panel building
- Reduces connection work between PLC and field components
- Large selection of pre-assembled cables with manufacturer-specific connectivity for all the relevant control systems

## Adapter Cards

- Allows for quick and error free I/O migration
- Feed through connections
- Conversion to pluggable connector(s)
- Existing field wiring remains
