Your requests deserve a quick response

Fast Delivery Service – Ship your order in 10 days

Weidmüller ⫘

Fast Delivery Service
## Your Design - We Assemble and Ship - Fast!

Todays challenges in plant design and control cabinet production

- Individualized designs
- More complexity
- Low volumes
- Supply chain challenges

- Tight deadlines
- Price pressures
- Design changes
- Hiring challenges

The Fast Delivery Service simplifies your planning, accelerates your production processes and guarantees the delivery of individually assembled and ready-to-install terminal rails and populated enclosures.

To meet these growing demands, you need ever more efficient planning and manufacturing processes - and you need to be able to rely on 100% fast and reliable delivery. With our Fast Delivery Service, we offer you both. In this way, you reduce your costs, increase your flexibility and stay one step ahead of your competitors.

Delivery Disclaimer: In the USA, 10 Day Fast Delivery Service applies to Rail Assemblies Only. Rail Assembly must include FDS program-specific components.
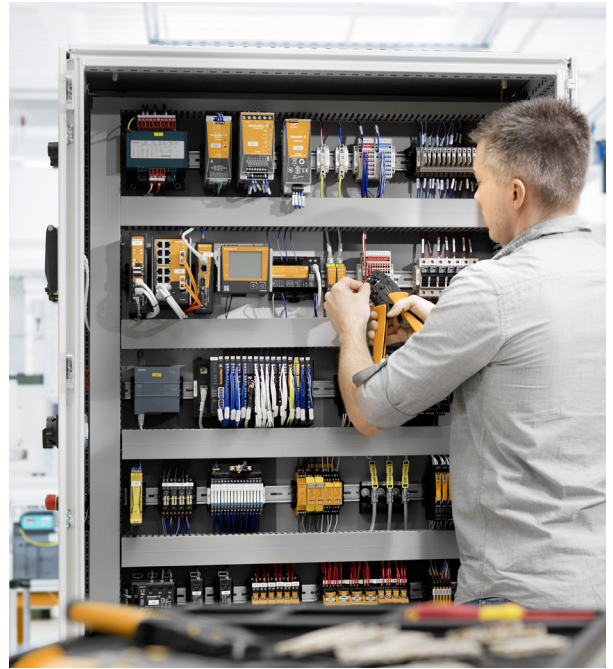

Your advantages at a glance
with our Fast Delivery Service

Increase your quality
Your customers demand maximum reliability. With Fast Delivery, you receive individual, ready-to-install assembled rail assemblies or enclosures in the shortest possible time. In this way, you avoid assembly errors – a decisive step towards higher quality.

Reduce your costs
Your plants are becoming more and more specific and complex. Therefore, you have to stock many required components in your warehouse. With Fast Delivery, you receive complete assembled products – and can significantly minimise your purchasing and storage costs.

Increase your flexibility
More and more often you will encounter smaller quantity projects and must be prepared for short-term changes. With Fast Delivery, you get individual rail assemblies and populated enclosures from batch size 1 – and shipped to you ready for installation. This increases your flexibility.

Optimization Made Easy
How to Save with our Fast Delivery Service

Our Fast Delivery Service is based on the Weidmüller Configurator (WMC), which provides you with comprehensive support. With our WMC, you can decisively optimize planning, component procurement and assembly in your control cabinet or enclosure production. This enables you to achieve cost savings in all areas.

1 Planning & construction
- System guided support
- Effective reduction of planning timeframes
- Error minimization due to product relationship knowledge and data interfaces

2 Purchasing
- Offers within minutes
- Shorter waiting times, less need for clarification
- Immediately order projects including complete documentation

3 Warehousing
- Reduction of goods quantity and complexity
- One product instead of many components in numerous packaging units
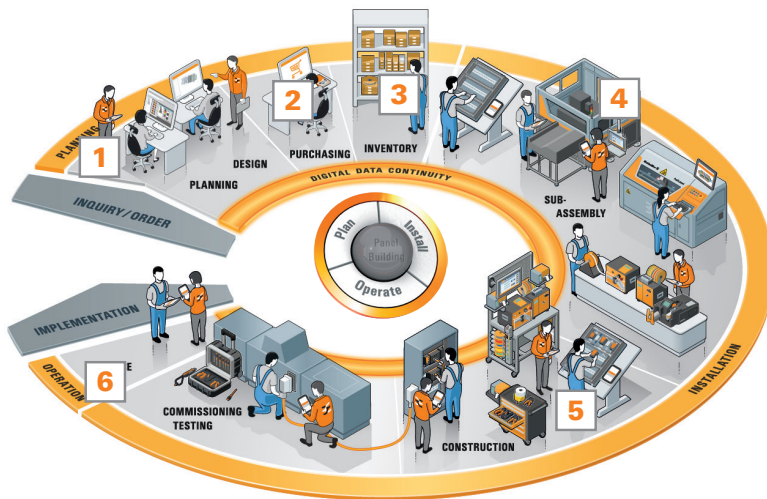

4 Work preparation & assembly
- Ready-to-install delivery of of products
- More time for your own added value

5 Workshop & construction
- More precise control cabinet planning
- Data interfaces for process automation

6 Service
- Reliable procurement times – even in the case of future maintenance and repairs

Accelerate your planning
Orders with tight deadlines and last-minute design changes require quick reactions in the planning phase. Benefit from all the advantages of our WMC. This includes simple configuration, perfect integration into your planning software, and complete data consistency.

Simplify your processes
For the complex tasks in your workshop there are often only a few specialists available. Fast Delivery simplifies planning, reduces production costs, and accelerates documentation. This allows you to deploy your skilled workers in a much more targeted and effective manner.

Meet your delivery commitments
You must complete and deliver your individual projects within tight time frames. Otherwise, your customers face high costs due to delays and production downtimes. With Fast Delivery, you can speed up all your processes and reliably meet your delivery commitments.

Individually manufactured according to your specifications

Whether it is modified products, assembled mounting rails or complete small cabinets - we provide high quality assembly services
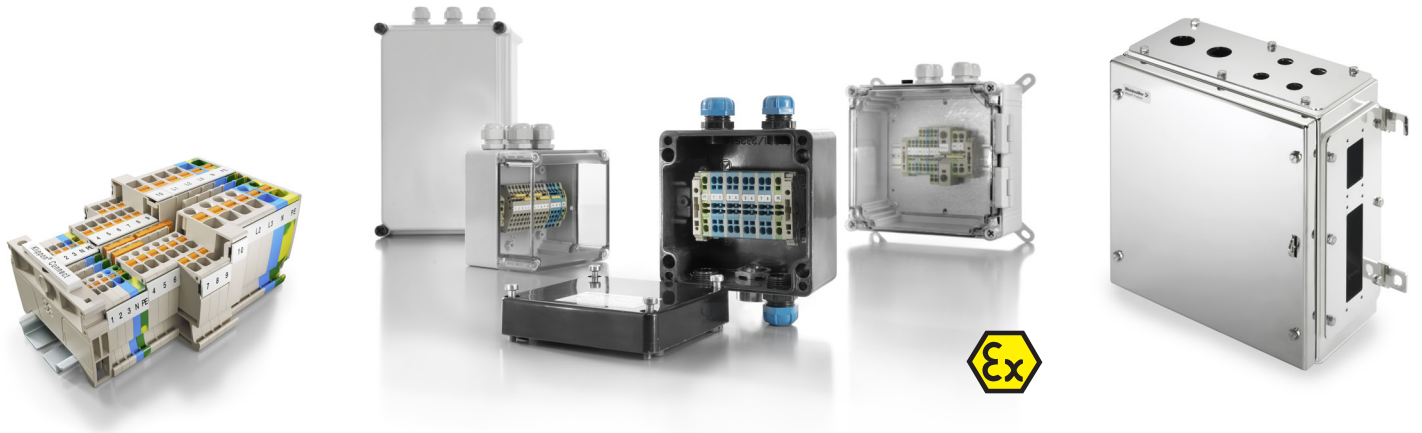

Klippon® Connect
Ready-to-install assembled rail assemblies including electronic components - individually manufactured according to your specifications.

Klippon® Protect
Individual empty enclosures with holes, threads or cut-outs according to your specifications - optionally unassembled, equipped or with add-on parts.

Klippon® Connect + Klippon® Protect
Assembled enclosures with rail assembly, add-on components and optional Ex approval.

Determine your own delivery time thanks to Fast Delivery Service

We offer the choice between 2 service levels

Your assembled product

Easily configure your rail assembly, your empty housing, or assembled housing with our **Weidmüller Configurator.**

Fast Delivery
The ideal solution for very demanding delivery schedules

Fast Quote
Quick price information for all products

- Wide range of products

1) 10 Day Fast Delivery on Rail Assemblies

2) Fast Quote on Populated Enclosures

- Individual configuration
- Immediate quote

Added value

Offer provided in minutes
Available 24/7, including part numbers for immediate ordering

Assembly from Quantity: 1
Ready-to-install assembly that meets your individual specifications

Reliable Delivery
Automated manufacturing and ready for shipment

We Support You Holistically
Your Design - We Assemble and Ship - Fast!

Data provision
Data is the basis for time-saving planning and project planning, error-free wiring, simple marking, and consistent documentation of your project. But don't worry: even if you don't have large ECAD and ERP systems, you can integrate your database with us. Often an Excel structural parts list is enough – and in case of any doubt we will help you with the preparation.

Weidmüller Configurator (WMC)
Configure your required components easily and conveniently with our WMC and choose from over 9,500 Weidmüller products. The software can be used on all platforms, is intuitive to use, compatible with all common CAD planning tools – and actively supports you in avoiding configuration errors.

Digitized production process
After you finish your order, the data will be forwarded to our production department. The entire production process runs automatically and with maximum precision – ensuring the highest reliability of your products.

Reliable delivery
Finally, your rail assemblies or enclosures are prepared for shipment and handed over to reliable shipping service providers who deliver your products to any location within the USA in the shortest possible time.

Just three steps to your first order
Your easy start with our Fast Delivery Service

Step **1**

Install our Weidmüller Configurator and simply register by e-mail: fds@weidmueller.com

Step **2**

Upload E-CAD files, or a structural parts list from Excel, or configure your products directly in our WMC.

Step **3**

Start the quotation process for your desired products with just one click.

Test it now!

Download our Weidmüller Configurator and enjoy the benefits of "configure to order"

Fast track planning with EPLAN, ECAD or Zuken and our WMC

1. Project planning in your Zuken or ECAD system and export to the WMC.

3. Review of the selected combination by the integrated verify assistant – to ensure maximum product safety.
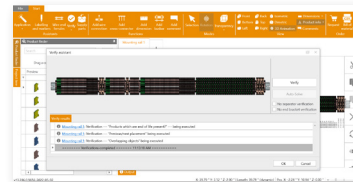

2. Selection of the optimal components based on the required service level. Simple selection of the relevant accessories.

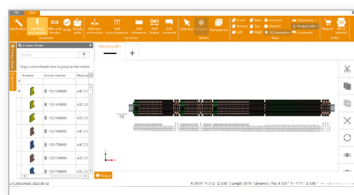

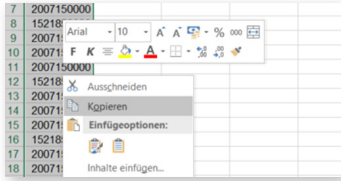

**4.** Request a quote from our WMC. An automatic offer is created in just a few minutes.

6
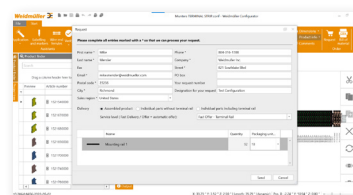

# Simplify your processes –Integrate with AutoCad

1. Create the BOM for your Weidmüller rail or populated enclosure assembly in Excel.

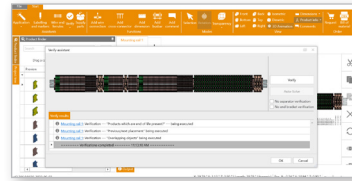

**2.** Copy and paste the BOM from Excel into WMC project work area

**3.** WMC will automatically create the assembly from the BOM

4. Verify assembly using the verification assistant.

5. Export dfx or STEP file and documentation into AutoCAD

6. Submit your assembly for a fast quote in the WMC

The choice is yours

- Our WMC supports you step-by-step as you select and configure your rail assemblies or your enclosures.
- Complete configuration in the WMC or import data sets from your AUTOCAD or ECAD system
- Making final adjustments in the WMC, then transfer them back again.
- Centralized documentation that is always up to date
- Avoid transmission errors
- Do not have to share your sensitive data with a third party.
- Using STEP files, the universal 3D CAD exchange format, export your WMC solution directly into your MCAD system, ensuring complete data consistency in all your systems

Three good reasons to start using our WMC now:

1. Secure and intuitive
Always current product data, the integrated plausibility check and the seamless documentation ensure that you can rely 100 % on your configurations. The clear 3D real-time visualization makes configuration significantly easier.

2. Convenient
Integrated interfaces facilitate the easy import and export of product data between our WMC and all commonly-used engineering tools, such as AUTOCAD, E³ or EPLAN electric P8.

3. Futureproof
The high quality product data and the standard export functions are preparing the way for the increasing automation in panel building.

Weidmüller – Your partner in Industrial Connectivity

As experienced experts we support our customers and partners around the world with products, solutions and services in the industrial environment of power, signal and data. We are at home in their industries and markets and know the technological challenges of tomorrow. We are therefore continuously developing innovative, sustainable and useful solutions for their individual needs.
Together we set standards in Industrial Connectivity.
