Weidmüller 

Workplace Solutions

Cut it. Strip it. Crimp it.

The new stripax[®] plus – now even easier

We have completely transformed our flagship multifunctional tool. The new stripax[®] plus can cut, strip, and crimp single wires in the cross-section range from AWG 20 to 14 (0.5 to 2.5 mm²).

The wire-end ferrules are stored in a magazine in the handle and are automatically transported to the crimping die. Adjustments to different cross-sections are made automatically so that no manual adjustment is required.

The New stripax® plus – Increase Efficiency and Productivity

Time-saving. Space-saving. All-in-one solution.

In field operations, there is often little space in the toolbox. That's why multifunctional tools like our Stripax® Plus are useful. With this tool, cutting, stripping, and crimping are quick and easy.

Wire-end ferrules
